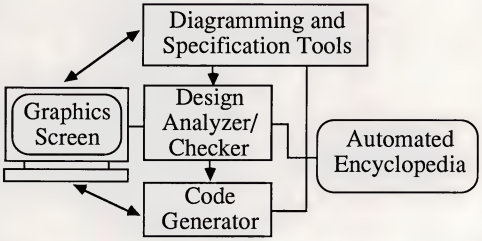
Complete CASE System



INPUT

NOTES:

JJ88-DT4-16A

© 1988 by INPUT. Reproduction Prohibited.

CASE Tools Advantages

- Assist in Project Management
- Assist in Design
- Improve Documentation
- Assist in Data Modeling
- Enforce Development Standards

INPUT

NOTES:

JJ88-DT4-17

© 1988 by INPUT. Reproduction Prohibited.

CASE Tools Advantages

- Assist in Development of Code
- Assist in Development of Test Cases
- Assist in Debugging
- Assist in System Release
- Assist in Maintenance

INPUT

NOTES:

JJ88-DT4-18

Vendor Directions

- Technology Push
  - PC Orientation
  - Integrated Products
- Modest Standards Efforts
  - Prohibits Ease of Interface
  - No International Body Involved

INPUT

NOTES:

JJ88-DT4-25

© 1988 by INPUT. Reproduction Prohibited.

Vendor Directions

- Extensive Alliance Formation
  - Front End - Back End & Vice Versa
  - Professional Services—Front-End Vendors
  - OEM Relationships
- Looking for Full Lifecycle Offering
  - Cost of Entry/Development Going Up

CASE Market and Opportunities—Conclusions

- Emerging Market - Relatively Long Cycle
- User Acceptance Will Grow at Modest Rate
- Continued Alliance Formation
  - Merger/Acquisition
  - True Leaders Emerge
- Standards Needed, but Little Progress to Date
- Front-End Products = $1 Billion

INPUT

NOTES:

© 1988 by INPUT. Reproduction Prohibited.

CASE-User Requirements for Success

- Understand the Impact on the Development Culture
- Well Disciplined Methodology
- Active Use of Structured Techniques
- Experimentation With CASE
- Well Defined CASE Objectives

INPUT

NOTES:

© 1988 by INPUT. Reproduction Prohibited.

CASE-Vendor Requirements for Success

- Use Relationships to Address Lifecycle
- Employ an Open Architecture
- Provide Consulting Support
- Support Standards

INPUT

Evolution s are reviewed more thoroughl

However, connectivity between A ... towards complete CASE systems that offer full life cycle support and flexibility for future development.

In terms of ADTs, complete CASE systems provide a total development environment of RDBMS, a central data dictionary or repository, 4GLs and two-dimensional graphical programming languages. Complete CASE systems allow the software engineers to build a graphical image of the derived application on his/her workstation and then automatically generate the code to produce it.

The characteristics of complete CASE systems are illustrated in a schematic given as Exhibit III-3.
